ABOUT ME

I am an IT enthusiast with hands-on experience in building mobile and web applications using React, Next.js, TypeScript, and Firebase. I'm interested in various areas of IT, including system administration, technical support, and software development. I enjoy learning new technologies, solving real-world problems, and turning ideas into working solutions.

EDUCATION

2022-2025

Vilnius Business College

Programming and Internet Technologies

TECHNOLOGIES

TypeScript, React, NextJS, Tailwind, Git, Firebase, SQL, HTML/CSS, Figma.

EXPERIENCE

Upwork Inc.

Freelancer | 2024-Present

Designing and creating React components for mobile applications and web platforms.

- Built responsive layouts with Tailwind CSS, ensuring seamless experience across devices.
- Developed reusable and modular UI components using React and TypeScript, improving code maintainability.

UAB Ainera Internship

Frontend Web Developer | 2024-Present

Designing and building web layouts using Next.js, focusing on responsive and user-friendly interfaces.

- Collaborating with team members to implement design mockups and ensure cross-browser compatibility.
- Applying modern frontend practices to create clean, maintainable codebases.

PROJECTS

Barteree - The Item Exchange App

Creator | 2025

A mobile app for users to exchange items locally and securely.

- Built the app with React Native, TypeScript, Firebase, and NativeWind.
- Added item favoriting and full CRUD for listings.
- Integrated APIs for location and notifications.
- Developed real-time chat for user communication.
